

Quick Chili

our own recipe, <https://cookme.cc/quick-chili>

Serves: 4–6

Total Time: 30–60 min

1 lbs	ground beef (we use >90%)
1.5 T	chili powder
1 T	minced dried onion
1/2 T	ground cumin
1/2 T	dried oregano
1/2 T	dried basil
1 t	granulated dried garlic (or powder)
1 t	cocoa powder (optional)
1/2 t	crushed red pepper
1/8 t	cayenne pepper (or more to taste)
1-2 c	frozen corn

1 can	15oz tomato sauce
2-3 cans	15oz kidney beans (drained)

Note: for soupier chili, add more tomato sauce or leave kidney beans undrained

I don't add salt, but you could.

Everything cooks in a large skillet.

On a medium-high to high stove, brown ground beef. Drain if using a high fat ground-beef.

Reduce heat to medium.

Combine all spices with meat and stir/mix to distribute spices evenly. (You can reserve the oregano, basil, and crushed red pepper to add with the tomato sauce later.)

Add the frozen corn. Cook for a few minutes, stirring until the corn is fully thawed.

Add the tomato sauce and heat until simmering, stirring occasionally.

Stir in the kidney beans and heat until simmering resumes. Reduce heat to low and simmer/heat through for 20–40 minutes.
